SUMMARY

Motivated software and web developer with a BSc in Information Technology and hands-on experience building, maintaining, and supporting web applications, APIs, databases, and multi-environment deployments. Strong in troubleshooting technical issues, improving system functionality, and collaborating across teams to deliver reliable digital solutions. My ability to effectively communicate and collaborate with cross-functional teams allows me to thrive in fast-paced and dynamic work environments. I am passionate about continuous learning and enjoy applying my technical skills to solve real-world problems efficiently. With a proactive mindset and strong attention to detail, I strive to contribute to high-quality solutions that enhance business operations and user experience.

EXPERIENCE

Software and Web Developer
Baselinedigital **January 2026 – Present**

- Develop and support client and internal web-based applications using modern front-end and back-end technologies.
- Diagnose and fix issues related to APIs, SQL imports, reporting tools, authentication flows, and live event/data management systems.
- Perform database maintenance and structured data updates in MySQL, ensuring data accuracy and system stability.
- Manage deployments and environment updates using Git, SFTP, cPanel, FileZilla, and PuTTY.
- Collaborate on debugging, feature delivery, and production support for multiple business systems and client platforms.
- Assist with maintaining scalable multi-environment solutions across local, staging, and production setups.
- Implement enhancements across React-based interfaces, backend services, and database-driven modules.

Junior Software and Web Developer
Mozayo Energy **January 2024 - June 2025, Sunninghill**

- Developed and maintained web applications to support Mozayo Energy's fuel distribution and energy consultation services, enhancing operational efficiency.
- Designed and implemented software solutions using modern technologies to optimize energy management processes and improve user experience.
- Collaborated with cross-functional teams to integrate innovative, sustainable practices into digital platforms, aligning with the company's environmental goals.
- Ensured high-quality code and system reliability through rigorous testing and adherence to industry standards, contributing to seamless business operations.

Junior IT Support (WIL & Contract)
ZONEFITNESS **December 2022 - December 2023, Pretoria**

- Provided IT support to staff across multiple branches, logged and resolved support tickets for staff IT issues.
- Set up desktops, laptops, and printers for new employees, installed and updated software as needed.
- Diagnosed and fixed basic network connectivity issues.
- Helped maintain and update IT inventory records, assisted with system backups and antivirus checks.
- Provided technical support during staff training and system rollouts.

Personal Trainer
BODYTEC **April 2023 - December 2024, Pretoria**

- Developed strong client relationships by understanding individual needs and delivering personalized EMS training programs, enhancing client satisfaction and retention.
- Utilized advanced EMS technology to monitor and analyse client performance data, providing actionable insights and optimizing training outcomes through data-driven decisions.

PROJECT

GitHub Repository - https://github.com/SimphiweMtshali?tab=repositories

Simphiwe-CarWeb
Personal Web Project • simphiwemtshali.github.io/Simphiwe-CarWeb/
- Designed and developed a responsive car dealership website using HTML, CSS, and JavaScript.
- Showcases front-end development skills including layout design, styling, and interactivity.
- Deployed using GitHub Pages to demonstrate web hosting and version control proficiency.
- Focused on user-friendly interface, mobile responsiveness, and clean visual presentation.

Full-Stack Web Application
Personal Web Project • simphiwemtshali.github.io/Data-Analytics-Dashboard/
- Developed a secure full-stack web application with user authentication, CRUD functionality, and real-time weather integration.
- Implemented token-based authentication using JSON Web Tokens (JWT) and password hashing for enhanced security.
- Built the frontend with React for a dynamic and responsive user experience, and the backend with PHP and MySQL for data management.
- Integrated a weather API and geolocation services to display current weather information based on user location.
- Focused on clean modular code, RESTful API design, and seamless client–server communication.

EDUCATION

BSc Information Technology
Richfield College • Pretoria • 2022 • NQF Level 7
Personal Trainer
ETA College • Pretoria • 2023 • NQF Level 5
Matric Certificate
Ladysmith High School • Ladysmith • 2019

SKILLS

Front-End Development: HTML, CSS, JavaScript, React.js, Bootstrap, Tailwind CSS.
Back-End Development: Node.js, PHP, Python (Flask, Django), C#, .NET.
Databases: MySQL, MongoDB.
Cloud: AWS.
Tools: Git, GitHub, npm, Docker, FileZilla, PuTTY.
Other: Database Optimization, Indexing, Data Modeling, Entity-Relationship Diagrams.
